INTRODUCTION

This selected bibliography of some 334 references is essentially an expansion of the earlier edition produced in March 1971 to mark the designation of the Polytechnic of North London.

As in that edition the list has been restricted, by and large, to the more substantial items in the now considerable literature. Polytechnics are seldom out of the local or national news but it is doubtful if inclusion of the many small notices would be of much interest to those outside the immediate area concerned.

All the references in the earlier edition have been retained and some 234 added for this edition. If a third edition is to be compiled it will probably be necessary either to select from this body of literature or to include all the references so far listed and to make a charge for the publication. Opinions on this matter would be much appreciated by the compiler.

The arrangement of the material has been changed from the earlier edition and many more headings introduced to break up long lists of references.
